

# Jisc organisational digital capabilities maturity model

## Content and information

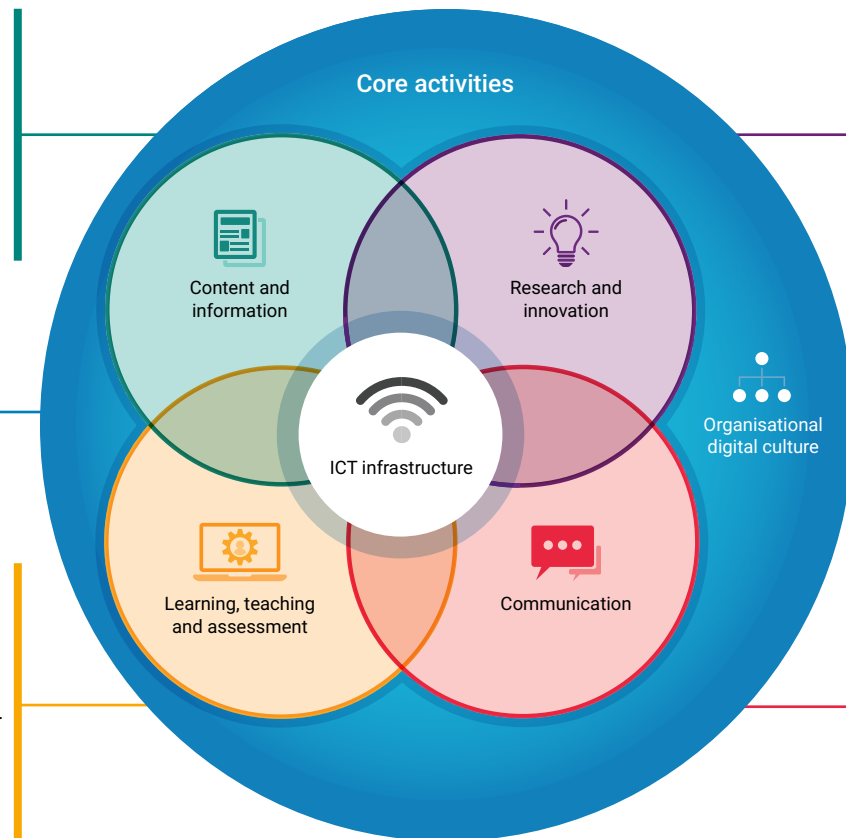

The organisation's information and research data management practices, and its management of research publications, are appropriate for an organisation which has knowledge creation and sharing at its heart.

## Organisational digital culture

The organisation embraces digital technologies as a key tenet of business success. The organisation develops the digital capabilities of its students and staff.

## Learning, teaching and assessment

Learning, teaching and assessment practices motivate and empower students and help them develop as digitally-capable independent learners. Learning, teaching and assessment practices use digital technologies to help demonstrate achievement and prepare learners for future success.

## Research and innovation

The organisation's research is underpinned by digital capability. The organisation's research and scholarship exemplify how its digital capabilities support corporate social responsibility and responsible research practice.

## ICT infrastructure

The organisation has a robust, secure and flexible digital Infrastructure. The organisation can give its staff and students reliable and secure access to the Information and tools they need.

## Communication

The use of digital communications enhances organisational efficiency and effectiveness. The organisation uses digital communications to further its strategic goals.
